Dream DM5620-S
Art.nr: DM5620-S
<p>Dreambox DM5620-S is without doubt a receiver with enormous future possibilities. It is similar to DM7000-S except that there is no connector for an internal harddrive. The receivers software is Linux based, which means that the software can be rewritten if desired and as needed. You can change the look of the onscreen menus, change functions, add games or record tv programmes to a PC directly.</p> <p>In all other respects the receiver is like any other. You dont need to be a Linux programmer to use it.</p> <p>Technical specifications</p> <ul style="list-style-type: none"> - 250 MHz IBM PowerPC Processor (350 Mips). - Linux Operating System. - 2 x DVB Common-Interface. - 1 x Smartcard-Reader. - MPEG2 Hardware decoding. - Common available NIMs (DVB-S, DVB-C). - V.24/RS232 Interface. - 100Mbit full duplex Ethernet Interface (only DM5620). - 4-digit 7-segment display. - Up to 64 MByte of RAM. - Unlimited channel lists for TV/Radio. - Channel-change time < 1 second. - Full automatic service scan. - Supports directly bouquet-lists (indirect unlimited). - Supports EPG (electronic program guide). - Supports multiple LNB-Switching control (supports DiSEqC). - Fully adaptable OSD in many languages (skin-support). - SPDIF Interface for digital bit stream out (AC-3 / DTS). - RF - Modulator and Video-Out Chinch. - 2 x Scart-interfaces (fully controlled by software). <p>Please note that we DO NOT give any support on this receiver.</p>
